AB The title compds. I ($\text{R}^1 = \text{C}_{10-30}$ linear or branched alkenyl, alkynyl; $\text{M} = \text{H}$, counter cation) and DNA polymerase α inhibitors containing I as active ingredients are claimed. The inhibitors are useful as antitumor agents. Activities of DNA polymerase α to produce DNA from deoxyribonucleotide triphosphate were 82 and 11% in the presence of I [$\text{COR}^1 = (\text{Z})$ -hexadecenoyl, $\text{M} = \text{Na}$] (preparation given) at 5 or 40 $\mu\text{g/mL}$, resp.
